NES miHealth

#### **NES ProVision: System Requirements**

The computer system specifications required to run the ProVision software are as follows:

- Windows XP (Service Pack 2 or higher), Windows Vista, Windows 7, Windows 8, Windows 8.1
- 1024x768 minimum screen resolution
- One free USB port
- 2GB RAM (recommended)
- 5GB free hard disk space (recommended)

NES ProVision can also be run on an Apple Mac. It will, however, require you to either dual boot with a Windows operating system, or use a virtual PC application such as VMWare Fusion, which allows for Windows to be run within the Apple environment. NES ProVision can then be installed within this Windows environment.

#### Installing the NES ProVision Software

**Step 1 -** Plug your NES ProVision installation USB key into your computer/laptop and connect to the internet.

**Step 2** - With the installation USB key inserted, your computer should automatically display the menu shown above.

Click 'Open folder to view files'

If the menu doesn't automatically show, click the Start menu then Computer (or My Computer), double-click on the USB drive labeled 'NESProVision' or 'NES Health'.

Step 3 - In the folder that opens,

Double click on the file named 'InstallProVision'.

Proceed through the installation process. This may take a few minutes.

Double-click the 'NES ProVision' icon on your desktop to launch ProVision.

License Key License Number: Expiry Date:	Unlock Online Manual Unlock Cancel	

Step 4 - Input your License Number in the box provided.

**Step 5** - Next, input your details on the Settings screen, then hit 'Save and Close'.

You now have NES ProVision installed and unlocked.

## NEXT...

set-up your NES miHealth.

## **NES miHealth**

#### Get to know your NES miHealth

Front View

Rear View

#### Inserting battery and turning on for the first time

Locate the battery compartment on the back of the NES miHealth and carefully slide it out.

Next, plug in miHealth battery as shown above.

Replace the battery compartment, then press the Power button to turn on your miHealth.

If the charge level is low, plug in your miHealth, using the cable provided, and charge for 3 hours.

Once your miHealth is on, you must calibrate the electrodes.

Press the Settings icon 🔌 found on the bottom right of the screen.

Press Calibrate Electrodes, and follow the instructions on screen.

# **Scanning a Client**

**Step 1** - With your computer on, plug the NES Scanner or the miHealth into the USB port of your computer and start up your ProVision Software.

	Client Details		Additional Information:
	Animali	PostZip Code:	
	Horse		
	Animal Name:	County/Region:	
	Control Demonstra	Counter	
	Sammy	United Kingdom	
	Owener's Surrame	Telephone	
	Footsie		
	Address 1:	Email	
			Edt
	Address 2:	Gender:	
		M34	
	city/fows:	Data Of Bally.	j)
			Start Scan
	Bask	Home Clent Details	Kan Mako
//			//

Step 2 - Navigate to the 'Add Client' screen.

Input the client's information on the Client Screen, then click Save.

**Step 3** - Ask your client to place their hand on the Scanner and click the 'Scan' button to begin scanning the Human body-field.

Ensure that the client keeps their hand on the scanner until the scan is complete.

**Step 4** - The client's scan is now complete and the ER screen will be displayed.

To perfect your scanning technique view the videos and webinars on the Quantum Health training site www.quantumhealthtraining.com

# ER's on the NES miHealth

## **Selecting an ER Function**

With the miHealth switched on -

Touch the ER folder on the Home screen using your finger or the stylus provided.

The next screen will display all ER functions.

2 Use the scroll bar on the right to look through the ER functions by dragging the gray bar up and down.

You can also scroll through the functions using the 'Side Buttons'.

To select an ER, highlight your desired function by touching it.

To proceed to the Run screen, press the 'Forward Button'.

#### **Run Screen - Using an ER Function**

**REMINDER...** Get training! Sign up to the next training event in your region.

# The Clinic in the Box

#### Reassess

**Step 1** - Use ProVision to assess or re-assess the flow of energy and information in the body-field and to highlight distortions and imbalances.

## Rejuvenate

**Step 2** - Use the NES miHealth to rejuvenate the body's energy flow through releasing any energy blockages or trigger points.

### **Re-imprint**

**Step 3** - Re-imprint the body-field back towards its original blueprint by providing the recommended protocol of Infoceuticals.

# **NES Portal**

## Ordering Infoceuticals on the NES Portal

Enter the following address into a web browser eg. Google Chrome.

#### www.neshealth.com/portal

Input your email address and password in the login box provided, then click the 'LOG IN' button.

> If you have forgotten your password, click on the 'Click here to reset your password' link and follow the instructions to reset your password.

In the Checkout screen above, you can review every item in your basket under the Summary section.

To proceed with your order, you must provide a Billing and Shipping address.

Click on the 'CHANGE ADDRESS' button to add an address.

If you need to add or remove an item click on the 'Go BACK TO BASKET' button.

Finally, to place your order, click the 'PLACE ORDER' button.

Follow the on screen instructions to make a payment.

Once you have successfully paid you should shortly receive a confirmation email and invoice.

#### CONGRATULATIONS

You have now placed an order.
